Home Preparedness Workshop

Please note the attached flyer!

The Preparedness Committee has arranged a community workshop to be held in the Clubhouse on Saturday, May 7 at 10:00 AM to 12 PM. The workshop will include an introduction from the Red Cross on their smoke detector replacement program, training from the Philomath Fire Department on CPR and AED, and work on preparing your own disaster plan.

Stoneybrook Pool

Although we encourage residents to enjoy the pool with their children and grandchildren (great-grandchildren?) we do need to remember the pool/spa policy, which is posted on the SVOA website under the Rules and Regulations heading. In particular residents are asked to check the restrooms after children leave to be sure the rooms are picked-up and clean. Also restroom doors should not be left locked.

Pond Bull Frogs

According to Wikipedia a group of Bull Frogs is call a “chorus”, and our pond seems to have attracted a chorus of frogs. Although the sounds of most choruses are pleasing to the human ear, the Stoneybrook Pond Bull Frog Chorus is not. Residents living close to the pond feel the SPBFC is singing off-key. Consequently our Pond Committee has arranged to have as many of the local Bull Frogs as possible removed. That task will commence next week.

Preparedness Tip

Steve Napack, Chairman of our Preparedness Committee passes along this tip: “After a large scale disaster phone lines are likely to be dysfunctional. Consider establishing a contact outside the local region for family and friends to call to check on your status. Also cell phone text messages have a better chance of getting through.”

Bernie H. Parsons, Secretary to the Board of Directors
