

Landscape Committee revisited several items of old business, including issues with Contract compliance, persisting irrigation issues, and various recurring matters.

NLS has performed pruning and has attended to some matters at Tracts F and K. Mowing has begun, though soil is soggy.

The Committee is aware that an Owner will be approaching the Board to perform an assessment of irrigation practices throughout the Village. The Committee wholeheartedly supports this activity, emphasizing water conservation and healthy landscapes/lawns.

Landscape Committee has struggled over many months with concerns about its proper role in serving the Board. The Committee is offering a DRAFT of a revised set of responsibilities. This revision is intended to delineate clear parameters for its activities.

Please be prepared with questions at Wednesday's Board meeting. Thank you for your attention.

Respectfully submitted,

Doreene Carpenter
