

Tree Committee Report
January 10, 2017

The Committee has approved 5 requests for limb removal in common area trees where branches extend into private yards. We have one bid for this work. Total cost \$1620). There are a couple of points in the bid requiring possible adjustment though I doubt the cost will be significantly affected. As soon as we have clarification on the bid we will activate this work.

We have asked Kurt to get bids for pruning all the common area trees along 49th street (excluding the street trees). This is a major project. We will report findings to the Board when bids have been received.
