

## Tree Committee Report

September 11, 2017

The Tree Committee has issued a purchase order to Limbwalker to remove 4 trees and grind the stumps in Tract K. The work (approved by ARC) should begin soon. The cost will be about \$ 1000.

The Tree Committee has reviewed a proposal from J B Good for pruning trees with low hanging branches in the common area near 45<sup>th</sup> Street. The bid is about \$ 1000.

We plan on adding to the J B Good proposal pruning of several trees in the park strip north of the clubhouse to be in compliance with city standards for clearance. We believe this will be a small project and should not significantly increase the cost of the other pruning project.

Finally, there is a tree that is in very poor shape in the common area along the walkway between Birdsong and Hollyhock. We are exploring the option of tree removal and replacement by Shonnard's. The proposed replacement tree is a yellowwood, which is the same species as on the other side of the walkway. We do not have an estimate of cost yet.
