

Tree Committee Report
February 6, 2017

Kurt has requested bids for pruning all the common area trees along 49th street (excluding the street trees). This is a major project. We will report our recommendations to the Board when bids have been received.

The Committee approved 5 requests for limb removal in common area trees where branches extend into private yards. We have two bids for this work. There are a couple of points in the bids requiring adjustment though we doubt the cost will be significantly affected (estimated total cost will be less than \$ 2000). This project is on hold until we have resolution of the tree-pruning project outlined above.

We expect to make decisions about replacing some of the 17 birch trees removed last fall and to initiate work on this project in February and March. We will seek necessary approval from ARC and report results to the Board.
