

## Tree committee report for January 2019

The major work of the Tree Committee since the last report involves the project to remove and replace of several flowering pears near the clubhouse.

The project originally involved 10 trees, but subsequent determination of property lines revealed that 6 of the trees are on property owned by the Lodge. The Lodge has not made a decision concerning the removal and replacement of these 6 trees so the Tree committee has excluded them from our scope of work on this project.

We have a bid for the removal of four trees from Buena Vista Arbor care but they are not able to do the job in a timely manner. Therefore we are proceeding with a bid from J B Good, a certified arborist who has done other projects in the village. Garlands Nursery is holding the replacement trees pending completion of the removal of the four trees remaining in this project.
